BAL-TROL

The World of Weightless Handling!

Bal-Trol systems give you the complete solution for a successful handling of any load up to 600 kg.

- Overhead rail system or crane for easy movement in any direction.
- Bal-Trol lifting device for weightless and fast lifting.
- Gripper, tailor made for your requirements.

All Bal-Trol products are using compressed air and are CE marked and ATEX approved (II 2G T4).

Balancing

Balancing makes the load weightless with a superior flexibility and excellent precision. Balancing with preset weights - Dual Balancing - is preferably used when loads of equal weight are to be handled.

Solutions for balancing different weights with our unique technique - Multi-Balancer - will be adapted for your particular loads.

With the load weightless – the operator can fast and accurate manipulate the load with his hands on the object.

Pro Speed-Handle or Sensi-Touch

Pro Speed-Handle or Sensi-Touch makes various weights and sizes of the load easy and fast to handle. A balance of approx. +/- 10 cm in height makes it easy to mount for example a roll to an axle.

Proportional control of up and down movements.

We are happy to make your handling weightless and ergonomic!
You give us your trust and Lifts All AB will provide you with a superior solution for your handling.

Please contact us for a complete review of your working place.
