

# LIFTS ALL

*A new approach to drum handling*

*Tell us what you want to handle and we will design and install the perfect system*

Join the world of weightless handling

DALE LIFTING AND HANDLING SPECIALISTS 0161 223 1990

## LIFTING TOOLS FOR BARRELS

Lifts All's handy grippers optimise the handling of barrels, for example in the food-, chemical- and pharmaceutical industries. The operator quickly and smoothly moves the barrels from point A to point B with no effort. Emptying a 100 kg barrel into a funnel, without spillage, is child's play with the right lifting tool.

### Ergonomics in focus

Whereas manual handling is uncomfortable and prone to injuries, and traditional tube lifters are ungainly, Lifts All's grippers are the perfect alternative. The ergonomic design immediately improves the productivity and shortly the operator notices an improved personal health. The employer sees a rapid decline in absence due to sore backs and shoulders. Not to mention that the barrels are kept in good condition as well.

### Cost-effective solution

Not only backs and joints are saved with good lifting aids. The owner also saves energy costs since the Bal-Trol and the grippers are powered by compressed air, consuming only 5-10 percent compared to traditional vacuum lifts.

**Controlling the lifts** The Pro Speed-Handle's (PSH) proportional control of movement up and down means that a gentle push on the button smoothly moves the load. A harder push moves the load faster. Flexibility in the Bal-Trol enables fine tuning of the vertical position by +/- 10 cm by manual influence directly on the barrel.

2988

**2988**

Control: PSH  
 Max load: 100 kg  
 Function: Quick and smooth vacuum gripper for lifting and emptying carton barrels, by turning them 180 degrees. Grips with vacuum cups on the side of the barrel.

**3055**

Control: PSH  
 Max load: 125 kg  
 Function: Quick lifting with vacuum cups gripping on the side of the carton barrel. Automatic adjustment of centre of gravity.

**3628**

Control: PSH  
 Max load: 100 kg  
 Function: Quick and handy vacuum gripper in stainless steel. Grips on the lid of the plastic barrel.

**3613**

Control: PSH  
 Max load: 250 kg  
 Function: Lifts steel drums of various sizes and weights. Mechanical grip under the edges of the lid. Gripping diameters 400-610 mm.

Media for all grippers:  
 Compressed air, 6-7 bar

# LIFTS ALL HANDLING SYSTEM

## The World of Weightless Handling!

Lifts All systems give you the complete solution for a successful handling of any load up to 600 kg.

- Overhead rail system or crane for easy movement in any direction.
- Balancer lifting device for weightless and fast lifting.
- Gripper, tailor-made for your requirements.

All Lifts All products are using compressed air and are CE marked and Atex approved II 2G

### Balancing

Balancing makes the load weightless with a superior flexibility and excellent precision. Balancing with preset weights - Dual Balancing - is preferably used when loads of equal weight are to be handled.

Solutions for balancing different weights with our unique technique - Multi-Balancer - will be adapted for your particular loads.

**Jiggle** - With the load weightless – the operator can fast and accurate manipulate the load with his hands on the object.

**Pro Speed-Handle or Sensi-Touch** - Pro Speed-Handle or Sensi-Touch makes various weights and sizes of the load easy and fast to handle. A balance of approx. +/- 10 cm in height makes it easy to mount for example a roll to an axle. Proportional control of up and down movements.

We are happy to make your handling weightless and ergonomic. You give us your trust and **DALE** will provide you with a superior solution for your handling.
