

VACULEX TP SCALE

LIFT AND WEIGH SIMULTANEOUSLY - WHAT'S NOT TO LIKE!

Another Ergonomic Uplifting Solution by Vaculex increases productivity and reduces costs.

Vaculex TP Scale is a new unique vacuum lift that lifts up to 45 kg. It weighs and lifts in a single motion. A built in scale allows each parcel/product to be weighed while being lifted. If required, the operator is able to set a weight limit. If the load exceeds this weight, a signal will indicate so.

We are happy to tell you more about the advantages and to learn more about your operation to see how we can help you!
